

The GSHS Poster Theme

Wool Seo

Dept. of Physics and Earth Science, Gyeonggi Science High School For The Gifted, South Korea
wool@wool.pe.kr

Introduction

- ▶ Posters are often used at conferences for presenting exciting new research results.
- ▶ So far no official AAU poster theme is available to the researchers and students at Aalborg University (AAU).
- ▶ The present theme changes this.
- ▶ The theme is a particular configuration of the baposter poster template [?] which you can find here <http://www.brian-amberg.de/uni/poster/> and must have installed in order to use the AAU poster theme.

Usage

- ▶ To use the AAU poster theme, place the `aauposter.tex` file in your preferred folder and modify the file to your needs.
- ▶ You can read more about how you can modify the theme in the documentation for the baposter template which you can find here <http://www.brian-amberg.de/uni/poster/>.
- ▶ 한글 지원도 잘 됩니다. 폰트가 마음에 안들어요.

Lists

Itemize

- ▶ item 1
 - ▶ subitem 1
 - ★ subsubitem 1
 - subsubsubitem 1
 - subsubsubitem 2
 - ★ subsubitem 2
 - ▶ subitem 2
- ▶ item 2

Enumerate

1. item 1
 - (a) subitem 1
 - i. subsubitem 1
 - A. subsubsubitem 1
 - B. subsubsubitem 2
 - ii. subsubitem 2
 - (b) subitem 2
2. item 2

Description

- desc 1 item 1
- desc 1 subitem 1
 - desc 1 subsubitem 1
 - desc 1 subsubsubitem 1
 - desc 2 subsubsubitem 2
 - desc 2 subsubitem 2
 - desc 2 subitem 2
- desc 2 item 2

Equations

Here is an example of an equation

$$f_X(x|\mu, \sigma^2) = \frac{1}{\sqrt{2\pi\sigma^2}} \exp\left\{-\frac{1}{2\sigma^2}(x - \mu)^2\right\} \quad (1)$$

Installation

You can either make a local or a global installation of the baposter poster template [?].
Local: Place the `baposter.cls` file in the same folder as the poster file `aauposter.tex`
Global: Place the `baposter.cls` file in your local latex-directory tree. This is by default `<somewhere>/textmf/tex/latex/baposter` where `<somewhere>` is
GNU/Linux: `/home/<username>`
Windows XP: `c:\Document and Settings\<username>`
Windows Vista+: `c:\Users\<username>`
Mac OSX `/home/<username>/Library`
On GNU/Linux and Windows, you have to update the filename database after placing `baposter.cls` in the correct folder. This is done by
GNU/Linux: `$ texhash ~/textmf`
Windows with MiKTeX Open the MiKTeX Settings dialog and click 'Refresh FNDB'.
Windows with TeX Live Open the TeX Live Manager dialog and select 'Update filename database' under 'Actions'.

Figures and Tables

You cannot use floats in the baposter template. However, you can use figure captions by using `\captionof` instead of `\caption`. This is demonstrated in Fig. 1. Moreover, you can also use `\label` and `\ref` to make references to your figures and/or tables.

Fig. 1: Here is a figure caption

As you can see, the text background is not white. If your figures do not have a transparent background, this may look too ugly for you. You can of course change the background colour through the `boxColorOne` option. Alternatively, you can make the background transparent. In Matlab, the following example demonstrates how this is done

```
f1 = figure(1);  
set(f1, 'Color', 'none');
```

You can also use `pgfplots` [?] for plotting your Matlab data. This is not that hard and the resulting plots are much nicer than Matlab plots, so I will strongly recommend that you have a look at `pgfplots` right here <http://sourceforge.net/projects/pgfplots/>.

header 1	header 2	header 3
data (1,1)	data (1,2)	data (1,3)
data (2,1)	data (2,2)	data (2,3)
data (3,1)	data (3,2)	data (3,3)

Table 1: A very simple table with booktabs

Known Problems

- ▶ The `math matrix environment` `\begin{matrix} ... \end{matrix}` causes an error. I do not know why. Use the `array` environment until the problem is resolved.

Feedback

- ▶ The AAU poster theme v. 1.1.0 has been tested with baposter v. 2.0, and it can be downloaded from my AAU website [?] or my personal website [1].
- ▶ If you find a bug in the AAU theme (and not in the baposter template), please do not hesitate to contact me. There is a FAQ at the baposter website [2], if you should have any problems with it.
